DIN-Size Via ITX Case (fits into car radio slot)

With this, probably the smallest computer case of the world, you are enabled to operate a powerful PC in the DIN-slot of your car. (car radios have DIN-size, too)

But on your desk, this case is a beauty, too.

The case is compatible to all VIA EPIA-M boards (even the new M10000)

You only need the following components for a fully configured system :

- this casing
- VIA EPIA-M board (eg. M10000)
- eg. 256MB DDR low profile RAM 0,8" inches high [click]
- eg. 40GB HDD 2,5"
- eg. low profile DVD-drive

CARTFT. COM Shop for mobile PC- and GPS-Solutions

Casetronic Travla C134

[http://www.cartft.com/catalog/il/50]

Included in delivery

- fanless external power adaptor 60W
- lowprofile heatsink
- rounded IDE cables
- detailed manual

Further informations: If you NOT want to build a CD-ROM oder DVD-drive into the case, you can use 1,25-inch DDR-RAM. If you want to build this case into your car, you maybe have to use a DC-DC converter to stabilize the 12V input. (ITPS or CarTFT DC/DC Converter)

If you plan to stick this case into the DIN-slot of your car, then please pre-check the depth of your DIN-slot!
